**Welcome Back! Students, Staff, and Faculty**

The purpose of YOUR UNM-Taos Library bi-monthly newsletter is to showcase some of the print subscriptions the college library still subscribes to for your academic research and personal interest. There is a plethora of resources available 24/7 through the Library website at <taos.unm.edu/library> so we thought it would be helpful to see what you could find by stopping in the Library occasionally.

We highlight the print resources in each newsletter and encourage you to access the online resources but we also want to remind you of the human resources who are ready and willing to help, either virtually or in person.

After going through a three month hiring process, the Library is now fully staffed. We welcome Dave Mansfield as the new Assistant Librarian, and Justin Hosea who has been promoted from a WorkStudy position to the regular staff Library Information Specialist position after a competitive search.

Dave has been working in public libraries for approximately 7 years, and came to us from his most recent position at our local Taos Public Library. He is not only very knowledgeable about navigating around library resources he’s also one of those folks who seems to have a permanent smile. So, if you’re beginning to stress out about your academic research or a need for information you can be assured that you will get calm, compassionate help from Dave.

Justin has been just what a supervisor looks for in a student employee. He has had the drive to continue to expand his skills while working at YOUR college library which has shown to be invaluable in helping students and faculty as well as keeping the library tools and resources functioning properly. Justin can help you find information for your research paper but he can also help when formatting the paper, printing out images, or scanning to your storage device. Come tap into Justin’s skills and eliminate some stress.

Some of the best UNM-Taos managers and program chairs started out as WorkStudy student employees and worked their way up both academically and professionally so we always encourage these employment opportunities.

Patricia Garza has been a WorkStudy employee at YOUR college library for almost two years, so again, you have someone knowledgeable to help you get over any anxiety you may have around using the Library materials and resources.

Lastly, just to highlight the caliber of human resources you can expect at YOUR UNM-Taos Library, at the annual NMCAL August retreat, Kathleen Knoth was selected as the 2017 Academic Librarian of the Year. The New Mexico Consortium of Academic Libraries consists of the Library directors of 39 public, private, and tribal college and university libraries. The announcement stated, “Kathleen works tirelessly in her community and state-wide for the advancement of libraries and librarianship. She contributes her time, energy and intellectual resources to this cause. She is in continual contact with her local legislators, making sure that our myriad library issues are not overlooked.”

Fiesta 2017 (left to right): Thomas Duran, Anita Bringas, Justin Hosea, Chenoa Velarde, Paulina Estrada, Roberta Vigil, Tasha Santistevan, Erica Holmes-Trujillo, Christal Martinez, Randi Archuleta, Ruben Varela, Sabry Blanton, Alejandro Silva.

---

Two Tips:

If you are a student suddenly discovering the assignments due on your syllabi, a faculty member looking for tools to help your students succeed, or a community patron curious about the databases available through the State Library for all New Mexico citizens, YOUR UNM-Taos Library staff stand ready to assist. You just need to ask!

If you have questions about coursework, requirements, or textbooks you can always contact a UNM professor, staff person, or fellow student by going to <directory.unm.edu> to get their e-mail address.
740) Surge in Right Whale Death Raises Alarms—Researchers seek to understand why whales are showing up in high risk waters in Canada. By E. Stokstad

50) Burying The Sky—At an Icelandic geothermal power plant, researchers are capturing carbon dioxide and burying it in the basalt to keep the greenhouse gas out of the sky—By Kate S. Zalzal

60) TRAVELS IN GEOLOGY—A Tale of Two rivers: Grand Junction, Colorado. Lying at the junction of the Colorado and Gunnison rivers, the town straddles two iconic landscapes. By Terri Cook & Lon Abbott

754 & 802) Seasons of the Gut—Seasonal cycling in the gut microbiome of the Hadza hunter-gatherers of Tanzania. pp.754 By S. Peddada/pp. 802 By S. A. Smits et al

**What’s New?**

**A Plato Reader: Eight Essential Dialogues**

**Posesas de la Habana: Novela**

Teresa Dovalpage's novel in Spanish, "Posesas de La Habana" concerns four women in a Cuban family who on a night in the year 2000, during one of Havana's enforced blackouts, reflect on their lives and uncover a century of history. PQ7392 .D68 P67 2004

**Essential Biological Psychology**

Biological processes play a central role in psychology. Drawing on the latest research, this clear and concise textbook provides students with a solid grasp of the relationship between mind and behavior, and a detailed understanding of the underlying structure and physiological mechanisms that underpin it. The functions of the nervous system are explained and implications for health are explored. Throughout the book, Barnes encourages students to evaluate essential concepts and theoretical issues.
